- Release Notes
- Updated Documentation
- Recording of this Session

Housekeeping

Keep an eye on “Announcements”

Utilize GOSupport announcements to keep up to date on important communication between product updates.

Microsoft Email Re: “extension isn’t compatible”

Subject: Modify your extension so it’s compatible with the version 26.0.23364.24052

If the extension in reference is “akoyaGO” – you do not need to worry about this – akoyaGO has it covered!

Enhancements

Banner notifications will now appear when attempting to deactivate a Contact record that is the “Primary Contact” on either a Constituent or a Fund.

A standard workflow template called “Populate Requirement Due” is now available. When configured, this will populate the “Due Date” on a Requirement record based off any date field on the Request record.

- Ex: 30 days after Project End Date. See release notes for link to KA.

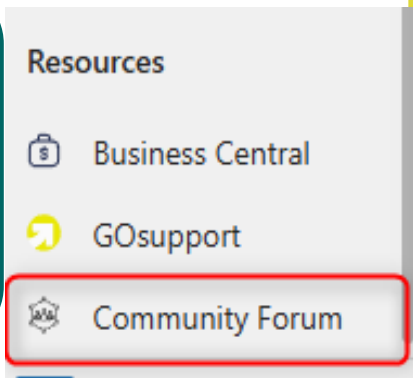

Validation has been added to prevent the same record from being added to a Mailing List twice. If a record already exists on the Mailing List you are trying to add it to, you will receive a pop-up notifying you that the record is already on the list.

akoyaGO Enhancements

We have added a link to the akoyaGO Community Forum (Discourse) to the sitemap in your akoyaGO app

We have added a subgrid to the “Org Details” tab on Constituent that will display all the child constituents for that record.

- All records where the constituent is listed as the “Parent Constituent”

GOapply Enhancements

Requirement - InterimReport

Requirement - Final Report

The Interim Report and Final Report panels have been removed. The function of these panels is now handled via code. **Important: these panels will still be supported in existing forms.** However, they will not be available on new forms.

We have removed the **Copy** and **Add to toolbox** options from dynamic panels on **Advanced Form Builder** to reduce submission and mapping errors.

The “Invite Constituent to Apply” feature has been enhanced so that, if no GOapply Users exist for that Constituent, the system will automatically create a GOapply user for the Primary Contact listed on the record and send the invitation to apply.

✕ 👁 ✂   Panel (dynamic panels)  Properties >

Scholarship Automatch
can now be set on an
Opportunity-by-
Opportunity basis.

- New field on GOapply Opportunity: **Automatch Enabled**
- For this to work, the “Automatch Enabled” field on **Goapply Settings** record must also be toggled on.

Scholarship Specific Letters
of Recommendation

- Transcript and Recommendation panels have been added to the Scholarship Form Editor, giving the ability to send scholarship-specific letters of recommendation.

Scheduled Publish:
GOapply Opportunities
now contain a date/time
field called **Publish Date**.

- This field works in conjunction with the **Publish** toggle (**Publish** must = ‘Yes’) to determine when an application becomes live on your Goapply site.
- This gives you the opportunity to set publish dates in the future.

Scholarships in Simple
Form Builder

- You can now utilize **Simple Form Builder** for **Scholarship-specific forms**

akoyaGO with Accounting – Enhancements

Concepts is now available
on the site map

Formal Fund Name
defaults to Fund Name
when none is specified

akoyaGO with Accounting – Enhancements

Mailable fund statements

Print fund statements in batches from CRM
